

July 2019 Newsletter

Our Featured Pets of the Month

KAYLA & MIA

Kayla & Mia love "helping" their hoomans set up their pool so they can enjoy their summers the right way. Bully sticks & raw bones are their favorite healthy chews. Their raw, natural diet helps keep them healthy & energized to go to work with their dad.

RILEY

Riley is your average happy go lucky Labrador retriever. He loves meeting new people and playing with his friends. In typical lab-style, he will snack on just about anything - from cookies to carrots!

COOPER

Red is a 15 year old cavalier. he might have lost his hearing at only age 6 but that hasn't hurt his confidence. Don't let his age fool you because he just recently retired from competing in agility, obedience, rally, and his current and all-time favorite -nose work.

**Answers Fermented
Raw Goats Milk**

- contains over 200 live probiotics
- fermentation prevents the growth of unwanted bacteria

Fresh Foods in Pets Diet

#Trending

Variety is the key to a healthy happy pet. Feeding the same foods over and over is not only boring, but unhealthy for your pet. Adding in fresh meats, fruits, and vegetables to your pets diet will add an abundance of vitamins, minerals, and amino acids for your pet while also adding the necessary moisture for your pets organs to properly function.

SO FRESH
